SAFETY OF FUNDS

SAFETY OF FUNDS

1. Security Management

1.1. The Company regularly identifies, assesses, examines and controls each type of risk related to its operations. The Company evaluates the effectiveness of the policies, arrangements and procedures from time to time to be able to cover the financial needs and capital requirements accordingly.

1.2. The Company is affiliated with top-tier banks that provide effective safety measures for the Clients' funds as an effort to be one of the most reliable and transparent financial firms in the industry.

2. Encryption

2.1. The Company provides a secured connection using advanced firewalls and Secure Sockets Layer (hereinafter the "SSL") that encrypt and protect any information that the Company's servers receive. This security protocol also prevents data theft and unauthorized access by third parties and keeping data integrity by ensuring that all data remains unchanged during transmission.

2.2. In terms of using and/or performing a transaction (deposit/withdraw) in the Company's website, all data and information collected are encoded and encrypted. Personal information entered in the website are protected by a security protocol to prevent data leak.
